

# PLAYERS & TEAM PERFORMANCE ANALYSIS

## Description

01

project is a comprehensive data analysis initiative aimed at evaluating the on-field performance of football players and teams

02

Detailed analysis of individual player and Teams performance (goals, assists, ratings)

03

To evaluate player and team performance through advanced SQL techniques and uncover actionable insights for improving strategy, selection, and management.

04

It focuses on identifying top performers, team strengths and weaknesses, and overall league dynamics using both descriptive and analytical techniques.
