Summary

Junior Data Scientist with strong foundations in Python, Machine Learning, SQL, and data analytics. Hands-on experience in building ML models (XGBoost), feature engineering, explainable AI, ETL-style data preprocessing, and dashboarding using Power BI. Actively learning LLMs, cloud deployment basics, and MLOps tools to contribute to production-level AI workflows.

Projects

CUSTOMER CHURN PREDICTION (PYTHON | XGBOOST | SHAP)

- Designed feature engineering pipelines and trained an XGBoost model to predict behavioral outcomes
- Built churn prediction model and identified **top 10% highest-risk customers** using XGBoost + SHAP
- Explained churn drivers and delivered insights for targeted retention actions
- Estimated **₹1.75L/month revenue protection** by targeting high-risk churn customers

MOVIE RECOMMENDATION SYSTEM (PYTHON | PANDAS | FEATURE ENGINEERING | SIMILARITY MODELS)

- Performed EDA on user-item interaction data
- Engineered content-based features using genres, ratings, and metadata
- Built a recommendation engine using similarity techniques to provide personalized suggestions
- Project relevance to adaptive learning and AI-driven recommendations

HR ANALYTICS DASHBOARD (POWER BI | DAX | SQL)

- Built interactive dashboards with KPIs and trend analysis
- Improved reporting speed by **85%**
- Used SQL queries and Power BI for reporting automation

Skills

- **Programming & ML**: Python, Pandas, NumPy, Scikit-learn, XGBoost; Regression, Random Forest
- **Data & Analytics**: Data Cleaning, EDA, Feature Engineering, Model Evaluation, Basic Statistics
- **Visualization & BI**: Power BI, Tableau, Matplotlib, Seaborn
- **Databases**: SQL (MySQL), basic MongoDB
- **Tools & Cloud**: Git (basic), Linux (basic), Jupyter/Colab, AWS (S3, EC2 – exposure)

Education

Bachelor's degree in Computer Science

Mumbai University | 2022 – 2025 | CGPA: 8.38

Master's degree in Computer Science

Mumbai University | CGPA: Pursuing

Internship

Python Full Stack Developer | YSM Info Solution | Feb 2025 – Jun 2025

- Implemented core modules such as login/user management, CRUD operations, and database connectivity.
- Assisted in testing, debugging, and improving features while collaborating with the team to understand requirements and workflows
- Assisted in documenting requirements, tracking issues, and coordinating updates with the team during feature changes.
